Please call 1-800-828-4881 or visit www.InvestwithICON.com for performance results current to the most recent month-end. [^] Effective January 23, 2018, the ICON Bond Fund was renamed the ICON Flexible Bond Fund.

*If you redeem Class C shares within one year of purchase, you may be charged 1.00% maximum contingent deferred sales charge (0.85% for the ICON Bond Fund). Class C share total returns for periods of one-year or less reflect the deduction of the contingent deferred sales charge.

ICON is entitled to reimbursement from the Funds of any fees waived pursuant to this arrangement if such reimbursement does not cause the Funds to exceed existing expense limitations and the reimbursement is made within three years after the expenses were reimbursed or absorbed. Gross Expense Ratio reflects all customary expenses incurred by a Fund, excluding, where applicable, waivers, reimbursements, and contractually agreed-to limits of the total expenses by the Funds' adviser. Net Expense Ratio reflects all customary expenses incurred by a Fund, including, where applicable, waivers, reimbursements, and contractually agreed-to limits of the total expenses by the Funds' adviser. Fund expenses shown are as of the most recent prospectus. For the ICON Equity Income Fund, the Total Annual Fund Operating Expenses do not correlate to the ratio of expenses to average net assets provided in the Financial Highlights section of the prospectus. The information in the Financial Highlights section of the prospectus reflects the Operating Expenses of the Fund and does not include Acquired Fund Fees and Expenses.

The Net Expense Ratio may exceed the contractually limited expenses because of interest, taxes, brokerage, and extraordinary expenses not waived by the Adviser.

There are risks involved with mutual fund investing, including the risk of loss of principal. There is no assurance that the investment process will consistently lead to successful results. Investments in international securities may entail unique risks, including political, market, regulatory and currency risks. Financial statements of foreign companies are governed by different accounting, auditing, and financial standards than U.S. companies and may be less transparent and uniform than in the United States. Many corporate governance standards, which help ensure the integrity of public information in the United States, do not exist in foreign countries. In general, there is less governmental supervision of foreign stock exchanges and securities brokers and issuers. An investment in a region fund may involve greater risk and volatility than a more diversified fund. Investing in fixed income securities such as bonds involves interest rate risk. When interest rates rise, the value of fixed income securities generally decreases. The Bond Fund may invest up to 35% of its assets in high-yield bonds that are below investment grade. High-yield bonds involve a greater risk of default and price volatility than U.S. Government and other higher-quality bonds. Call options involve certain risks, such as limited gains and lack of liquidity of the underlying securities, and are not suitable for all investors. There are risks associated with Small and Mid Cap investing such as less liquidity, limited product lines, and small market share. There are risks associated with selling short, including the risk that the Long/Short Fund may have to cover its short position at a higher price than the short price, resulting in a loss. The Fund's loss on a short sale is potentially unlimited as a loss occurs when the value of a security sold short increases. An investment concentrated in sectors and industries may involve greater risk and volatility than a more diversified investment.
