¹ During the year ended September 30, 2017, ICON Advisers waived \$8,138 and \$36,565 and recouped \$0 and \$2,165 of Class A and S expenses, respectively. At September 30, 2017, ICON Advisers was waiving expenses for Class A and recouping expenses from Class S.

² ICON Advisers contractually agreed to limit the total expenses of the Fund (excluding interest, taxes, brokerage and extraordinary expenses) to an annual rate for Class A of 1.75% and Class S of 1.50%. This expense limitation may be terminated at any time after January 31, 2019 upon 30 days written notice to the Fund's Board of Trustees. ICON Advisers is entitled to reimbursement from the Fund of any fees waived pursuant to this arrangement if such reimbursement does not cause the Fund to exceed existing expense limitations and the reimbursement is made within three years after the expenses were reimbursed or absorbed.

Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class A	\$744	\$1,156	\$1,593	\$2,802
Class S	\$154	\$ 515	\$ 900	\$1,980

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 75% of the average value of its whole portfolio.

Principal Investment Strategies

The Fund uses a quantitative methodology to identify securities ICON believes are underpriced relative to value. It normally invests at least 80% of its net assets, plus any borrowings for investment purposes, in equity securities of companies in the Industrials sector (as determined by the Global Industry Classification Standard) including, but not limited to: Aerospace & Defense, Agricultural & Farm Machinery, Air Freight & Logistics, Airlines, Airport Services, Building Products, Commercial Printing, Construction & Engineering, Construction Machinery & Heavy Trucks, Diversified Support Services, Electrical Components & Equipment, Environmental & Facilities Services, Heavy Electrical Equipment, Highways & Railroads, Human Resources & Employment Services, Industrial Conglomerates, Industrial Machinery, Marine, Marine Ports & Services, Office Services & Supplies, Railroads, Research & Consulting Services, Security & Alarm Services, Trading Companies & Distributors, and Trucking. This strategy may not be changed unless the Fund shareholders are given at least 60 days' prior notice. Equity securities in which the Fund may invest include common stocks and preferred stocks of companies of any market capitalization.

Principal Investment Risks

Like all investments in securities, you risk losing money by investing in the Fund. The main risks of investing in this Fund are:

- *Industry, Sector, and Concentration Risk.* Companies that have similar lines of business are grouped together in broad categories called industries. Certain industries are grouped together in broader categories called sectors. The Fund overweights industries within the Industrials sector, which causes the Fund's performance to be susceptible to the economic, business or other developments that affect those industries. The Industrials sector includes manufacturers and distributors of aerospace and defense goods and services, building projects, electrical equipment and machinery and companies that offer construction and engineering services. It also includes providers of commercial and professional services including printing, environmental and facilities services, office services and supplies, security and alarm services, and human resource and employment services. The Fund is subject to the risk that the securities of such issuers will underperform the market as a whole due to legislative or regulatory changes, adverse market conditions and/or increased competition affecting the Industrials sector. The prices of the securities of companies operating in the Industrials sector may fluctuate due to the level and volatility of commodity prices, the exchange value of the dollar, import controls, worldwide competition, liability for environmental damage, depletion of resources, and mandated expenditures for safety and pollution control devices.

- *Non-Diversified Portfolio Risk.* The Fund is "non-diversified" which means that it may own larger positions in a smaller number of securities than portfolios that are "diversified". The Fund may invest up to 25% of its total assets in the securities of one issuer. This means that an increase or decrease in the value of a single security likely will have a greater impact on the Fund's net asset value ("NAV") and total return than a diversified portfolio. The Fund's share prices may also be more volatile than those of a diversified fund.
- *Small and Mid-Size Company Risk.* The Fund may invest in small or mid-size companies which in turn may involve greater risk of loss and price fluctuation. The trading markets for securities of small-cap issuers may be less liquid and more volatile than securities of larger companies.
- *Stock Market Risk.* The value of the stocks and other securities owned by the Fund will fluctuate depending on the performance of the companies that issued them, general market and economic conditions, and investor confidence. The market also may fail to recognize the intrinsic worth of an investment or ICON may misgauge that worth.
