Quarterly Factsheet

3Q'20

as of 9/30/20

Target Weightings % (as of 9/30/20)

Portfolio Inception: 1/1/93

Growth of \$25,000 Investment (1/1/93 - 9/30/20)

Net Performance \$131,189

The data quoted represents past performance, which is no guarantee of future results. A hypothetical \$25,000 investment in ICON's U.S. Growth Portfolio made on 1/1/93 would have been worth \$131,189 on 9/30/20. The performance results displayed represent the composite performance for all discretionary client accounts in a Portfolio. The performance results reflect the deduction of actual management fees and trading expenses, the reinvestment of dividends and other distributions made to client accounts.

About the Portfolio

We believe the primary key to successful investing in the U.S. stock market is tied directly to sector rotation and timely industry rotation within each sector.

The U.S. Growth Portfolio strives to increase the value of your account through a rise in the market price of securities or NAV of funds (capital appreciation) invested in U.S. sector, diversified, and bond mutual funds.

Relative Risk

Moderate to High

The relative risk profile shows our assessment of the potential volatility of the ICON-managed portfolios relative to one another and should not be used to compare the portfolios to other types of investments. Each portfolio has its own strategy and risk/reward profile, and a portfolio's risk profile is subject to change.

⁴Allocations are based on the most recent New Money Target report and fund holdings as of the most recent quarter-end. Cash & Cash Equivalents data is based on the aggregate of the cash position in the Portfolio and any cash positions in the underlying mutual funds. All fund holdings data is an estimate based on the most recent quarter end positions. Other Assets and Liability figures within each Fund are not separately reported but are not included in the Funds' Net Asset Value.

Important Information

ICON Advisers, Inc. ("ICON") is a registered investment adviser incorporated in 1991. ICON uses a disciplined, objective, non-emotional methodology to identify industries and sectors that our methodology suggests are underpriced relative to our calculation of intrinsic value. ICON utilizes sector and industry rotation to invest in U.S. and foreign securities of any market capitalization. ICON offers its disciplined, objective, non-emotional methodology across a wide range of portfolio solutions, including tactical fund allocation portfolios, diversified and sector mutual funds, as well as diversified and concentrated separate accounts.

Investing in securities involves inherent risks, including the risk that you can lose the value of your investment. There is no assurance that the investment process will consistently lead to successful results. An investment concentrated in sectors and industries may involve greater risk and volatility than a more diversified investment, and the Technology sector has been among the most volatile sectors in the market. There are risks associated with Small and Mid Cap investing such as less liquidity, limited product lines, and small market share.

Portfolio composition and holdings are subject to change at any time and should not be construed as a recommendation of any security. Individual account holdings and composition may vary. Opinions and forecasts regarding sectors, industries, companies, countries and/or themes, and portfolio composition and holdings, are all subject to change at any time, based on market and other conditions, and should not be construed as a recommendation of any specific security, industry, or sector.

ICON claims compliance with the Global Investment Performance Standards (GIPS®). The periods prior to January 1, 1995 have not been verified. To receive a complete list and description of ICON's composites and/or a GIPS® compliant presentation, please call 1-800-828-4881 or visit www.InvestwithICON.com. Additional information regarding ICON's policies for calculating and reporting returns is available upon request. Returns are calculated in U.S. dollars. The Portfolios do not utilize leverage or derivatives, although ICON may invest in mutual funds that utilize these tactics.

The unmanaged Standard & Poor's Composite 1500 (S&P 1500) Index is a broad-based capitalization-weighted index comprising 1,500 stocks of Large-cap, Mid-cap, and Small-cap U.S. companies. The Bloomberg-Barclays U.S. Treasury Bellwether (3 Months) Index is a market value-weighted index of investment-grade fixed-rate public obligations of the U.S. Treasury with maturities of 3 months, excluding zero coupon strips.

Total returns for the unmanaged indexes include the reinvestment of dividends and capital gain distributions but do not reflect deductions for commissions, management fees, and expenses. The indexes are not covered by the report of independent accountants. The Portfolio's composition may differ significantly from the index. Individuals cannot invest directly in an index. All data shown is for Institutional Class shares, performance for other classes will vary due to differences in fees and expenses. Please see the following disclosures page for any reorganization details for the funds. All historic performance and financial information presented is that of the Predecessor Funds, which were the accounting and performance survivor funds of the reorganization commencing after the close of business on July 10, 2020. Historic information presented for the Institutional Class share is based on that of the Class S of the Predecessor Fund

*Not annualized | [^]The Net Expense Ratio may exceed the contractually limited expenses because of interest, taxes, brokerage, and extraordinary expenses not waived by the Adviser. Gross Expenses are all customary expenses incurred by a Fund, excluding, where applicable, waivers, reimbursements, and contractually agreed-to limits of the total expenses by the Fund's adviser. Net Expense Ratio reflects all customary expenses incurred by a Fund, including, where applicable, waivers, reimbursements, and contractually agreed-to-limits of the total expenses by the Funds' adviser. Fund expenses shown are as of the most recent prospectus. Had such fees not been waived, returns would have been lower.

There are risks associated with investing in mutual funds, including the risk of loss of principal. There is no assurance that the investment process will consistently lead to successful results. There are risks associated with small- and mid-cap investing such as limited product lines, less liquidity and small market share. An investment in a sector fund may involve greater risk and volatility than a diversified fund. There are risks associated with selling short, including the risk that the Long/Short Fund may have to cover its short position at a higher price than the short price, resulting in a loss. The Fund's loss on a short sale is potentially unlimited as a loss occurs when the value of a security sold short increases. Call options involve certain risks, such as limited gains and lack of liquidity of the underlying securities, and are not suitable for all investors. Investing in fixed income securities such as bonds involves interest rate risk. When interest rates rise, the value of fixed income securities generally decreases. High-yield bonds involve a greater risk of default and price volatility than U.S. Government and other higher-quality bonds. Investments in international securities may entail unique risks, including political, market, regulatory and currency risks. Financial statements of foreign companies are governed by different accounting, auditing, and financial standards than U.S. companies and tend to be less transparent and uniform than in the United States. Many corporate governance standards, which help ensure the integrity of public information in the United States, do not exist in foreign countries. In general, there is less governmental supervision of foreign stock exchanges and securities brokers and issuers.
